Patients Received Timely Access to Care

## New Features

### Vacancy Dashboard

Monitor and manage vacancies, pending matches, and accepted matches from a single dashboard view

### Delay Reasons

Automated alerts for capturing notifying, reporting, and analyzing patient delays

### Bedside Signatures

Edit and sign pdf forms digitally without downloading

### Smart on FHIR

Manage referrals from Epic / Cerner App Marketplaces (rollout 2023)

## Key Achievements

"Strata's technology has enabled us to fill the access gap by creating better connections between health systems and psychologists and faster, more accurate referrals for people with mental health needs. People seeking treatment deserve to receive the right care the first time; with Strata Health, we deliver."

- **Richard Morrison**  
CEO, Ontario Psychological Association

"We place high value on workflows and tools that can help us facilitate safe transitions and reduce unplanned readmissions. The Strata application has helped us to match patient needs with the best available resources. It has helped us to facilitate optimal and timely communication with post-acute providers."

- **Pamela Foster, LCSW, MBA, ACM-SW**  
Vice President, Care Coordination, HonorHealth

"We have seen a 38% increase in Home First referrals. With no extra resources, it has had no negative impact on service delivery or delayed discharges."

- **Charlotte Howard**  
Discharge Lead, Blackpool Victoria Hospital

### Canada

62%

Fraser Health reduced alternate level of care days for LTC patients by 62% with Strata Health

Strata Health's province-wide solution optimized access and placement to over 120 long-term care sites in Nova Scotia

### United States

Strata Health's Transition of Care Platform launched with 3 integrated products, Strata Search, Sign and Send

HonorHealth was the 1st U.S. health system to deploy the complete product suite across six hospitals

### United Kingdom

NHS Cornwall and Isles of Scilly ICB joined the list of fully serviced, system-wide matching and e-Referral partners, working towards go live in early 2023

Integration to NHS e-Referral Service (e-RS) enables triage, added ED integration, and access to 111 local directories across England

## The Road Ahead

### Healthcare Trends to Watch in 2023

- Patient-facing tools for engagement, choice, and self-referral
- Predicting expected length of stay, allowing proactive discharge planning
- Robotic Process Automation (RPA) to streamline operations
- Visible bed capacity and optimized placement
- Equitable access to community services and mental health
